

# SORT-OF-CIRCLE SKIRT PATTERN

FABRIC  
FOLDED IN  
QUARTERS.

$r$  = radius

$w$  = waist - measure

$L$  = length - measure

$h$  = hemline - estimate based on  
fabric available

Then

$$r = L / \left( \frac{4h}{w} - \frac{8}{w} - 2 \right)$$

Use inches!

\* This is an approximation so  
please check measurements prior  
to cutting fabric.

\* You will need to add seam  
allowances too!

- For front piece, cut wedge shape on fold
- Cut 2x wedge shape for back pieces.
- You will need to cut a waistband and (optional) pockets  
so make sure there is enough fabric before cutting!
